

# **Julius Ivander Massie**

## **Software Engineer**

Pekanbaru, Indonesia | Phone: +6285272997384 | Email: juliusivanderm@gmail.com

### **SUMMARY**

---

Passionate and eager to learn software engineer with 2 years of experience in backend development using Node.js and 1 year of experience in frontend development with React and PHP. Skilled in building scalable, secure web applications and APIs, with passion for delivering clean, maintainable code. Adept at collaborating with cross-functional teams to meet business goals and deadlines.

### **EXPERIENCE**

---

#### **Gorrywell – Jakarta, Indonesia**

Fullstack Developer (April 2023 – Now)

- Collaborated closely with product manager and cross-functional teams to ensure seamless integration of services and meet project milestones.
- Implemented a dynamic, responsive interface using React, effectively translating product requirements into user-friendly designs, enabling reporting for user activities.
- Developed, maintained, and documented scalable APIs in Node.js, enhancing code readability and testability.
- Developed a gamification system within the platform, incorporating challenges (e.g., quizzes, running challenges) to engage users and increase activity.

#### **Moladin – Jakarta, Indonesia**

Software Engineer – Backend I (June 2022 - February 2023)

- Developed and maintained APIs in Node.js, contributing to comprehensive API documentation in Jira and Postman, followed by unit testing in Jest.
- Collaborated closely with product manager and cross-functional teams, enabled electronic signatures for vehicle handover transactions, streamlining processes and reducing manual workload.
- Implemented invoice generation features for transaction receipts and reports
- Performed critical hotfixes to resolve production issues, ensuring minimal impact on end users.

#### **Suitmedia – Jakarta, Indonesia**

Backend Developer Intern (February 2022 – June 2022)

- Collaborated with the product manager and clients to understand project requirements and deliver tailored solutions.
- Enhanced and developed new features for the existing project, improving user experience and meeting client specifications.
- Debugged and resolved functionality issues, contributing to a 10% reduction in reported bugs.

### **PROJECT**

---

#### **Amaterasun – Sunnies Physical Challenge**

- Implemented a dynamic and responsive interface using Laravel, successfully delivering the project within a tight deadline.
- Collaborated closely with the backend team and product manager to ensure seamless integration between the frontend interface and backend interface.

#### **DailyTax**

- Developed scalable APIs in Node.js, ensuring high performance and reliability for Indonesia's tax management CMS.
- Contributed to comprehensive API documentation in Postman, reducing integration time.
- Collaborated closely with product manager and cross-functional teams to ensure seamless integration of services and meet project milestones.

### **EDUCATION**

---

#### **ESA UNGGUL UNIVERSITY (2018 - 2023)**

Bachelor of Computer, Informatics Engineering – GPA 3.90

## **SKILLS**

---

- Backend: Node.js, Laravel, Express, MongoDB, SQL, REST APIs
- Frontend: React, JavaScript, HTML, CSS, API Integration
- Other Tools: Git, Unit Testing, Jira, Postman
- Soft Skills: Attention to detail, Collaborative team player, Problem-solving mindset, Eager to learn
